1827?

REMARKS.

THE Trees, Shrubs, and Plants, contained in the annexed Catalogue, can be packed in such manner as to be transported at any season of the year ; and all orders from a distance receive the same pointed attention as if the persons desiring them were present to make their selections ; information will also be freely imparted with regard to the best means of culture, &c. ; and the packages will be shipped to any port designated. Remittances can be made by draft on any city from Portland to New-Orleans. In the transmission of plants to foreign countries, and to the various ports of the Union, New-York possesses decided advantages, regular packets being established with a great number of places, both at home and abroad, and her general facilities of intercourse being so enlarged and increasing.

In offering to the public this Catalogue, the Proprietor cannot refrain from calling the attention of amateurs to the numerous highly interesting trees and plants which it contains, and many of which are found in no other collection in our country. These have, in many instances, been attended with such expenses in their importation, that had a desire for profit *alone* animated the Proprietor, he would not have been so ardent in obtaining them : but desirous that our country should at least hold that rank in her botanic collections which she does in every other respect, and influenced by that zeal which ever inspires the votaries of Flora, he has incurred disbursements to an amount never hazarded by any other individual in our country. The prices of the plants newly imported are regulated by their absolute *cost*, and will be lessened as their culture may be attended with more or less success ; many of those of less recent introduction are now placed at prices much reduced. An establishment so extensive as this, cannot of course be conducted without immense disbursements, in making which the Proprietor has greatly to rely upon the patronage he may receive in the sale of its productions. It is his desire to introduce into our country every Tree, Shrub, or Plant, which may be useful in the various departments of national industry, as well as those which serve to gratify our pleasures alone : and it remains now to be tested, whether the success which shall attend the very extensive importations already made, will war-

rant their continuance on the same expensive scale. Comprising, as this garden does, an extent of more than 30 acres, *compactly filled*, with the very extensive range of Green-Houses, which contain above 20,000 plants in pots, and being surpassed, or equalled, by few even of those which have received in foreign countries the patronage of Royalty, the Proprietor's most anxious desire has been to give to his establishment the character of a *National Institution*; and, animated by those feelings, which all seem concentrated in the "*pride of country*," he relies on that country to aid in its advancement.

Orders from a distance can be transmitted through an agent, or *direct* by mail or otherwise, and the various demands will be executed with that accuracy and despatch which characterize the general transactions of the establishment.

N. B. Distinct Catalogues and Publications relative to the establishment may be obtained of the different agents, or by application to the Proprietor, as follow.

The four first mentioned being distributed *gratis*.

No. 1. Fruit and Hardy Ornamental Trees, Shrubs, and Plants.

No. 2. Bulbous and Tuberous Rooted Plants.

No. 3. Green-House Trees, Shrubs, and Plants.

No. 4. American Indigenous Trees, Shrubs, and Plants.

No. 5. A Short Treatise on the Culture of Trees and Plants generally, price \$1, and this sum transmitted, post paid, to the author, will insure its prompt remission, which can be done by mail at a trifling expense.

Nos. 1, 2, 3, and 4, ready for delivery. No. 5 in the press, and will be published speedily.

Mr. Prince expects also to be shortly able to announce the publication of the first part of his work on American Horticulture, which will be issued in four parts.

CATALOGUE

OF

**Green-House Shrubs, Vines, Herbaceous Plants, and
Bulbous Roots,**

CULTIVATED AND FOR SALE AT THE

LINNÆAN BOTANIC GARDEN,

FLUSHING, Long-Island, near New-York.

WILLIAM PRINCE, Proprietor,

C. M. of the Linnæan Society of Paris, of the Horticultural Society of London, and of the Imperial Society of the Georgofili at Florence, &c.

Nearly all of the following will thrive in a comfortable sitting-room during the winter—they are in either pots or boxes, and the prices are inclusive. It will be perceived that immense acquisitions have been made to the Green-House department, and great perspicuity and attention have been bestowed in order to select the most beautiful and interesting; and in doing this, the proprietor has rather consulted the aggrandisement and extension of the establishment, than a particular regard for pecuniary benefit to himself; and very many of the plants have been purchased at an expense of from one to five guineas each. The collection will also be found extremely rich in Chinese and Japan plants. Those which have no prices attached to them, will not be for sale until the autumn of 1827.

N. B. Those checked thus,* though generally cultivated as Green-House Plants, will stand the winters of the Middle States in the open air, and a very large proportion of the others will support the winters of the Southern States.

		Each. \$. cts.
1 Maple leaved abroma	Abroma augusta	2
2 Jamaica liquorice	Abrus precatorius	1
3 Prickly leaved acacia	Acacia armata	1
4 White flowered do.	peregrina	1
5 Broad podded do.	latisiliqua	
6 Delicate do.	pulchella	1
7 Double headed do.	stricta	1
8 Glaucous do.	glauca, <i>vel Mimosa</i>	1
9 Two spiked superb do.	lophanta	1 50

320 Do. white do.	<i>v. albo</i>	2
321 Large flowering do.	grandiflorus	5

The following collection of Camellias comprises all the newest varieties, many of which are very remarkable for their splendour. Those priced at \$25, cost the proprietor *five guineas each*; and many others from three to four guineas. The present prices will be gradually lessened as the plants are increased; but, owing to the universal admiration which this plant has received, and its requiring so little care, and enduring without injury a great degree of cold, the demand has hitherto been very great. The proprietor has at all times very large quantities to supply wholesale orders.

322 Single red camellia, or <i>Japan rose</i>	Camellia japonica	2
323 Semidouble red do.	<i>expansa</i>	\$4 to 5
324 Double red do.	<i>rubro pleno</i>	4 to 5
